

Arsenii Oguzov

Full-Stack Software Developer

About Me

I am an enthusiastic Full-Stack Software Developer with over four years of experience. I am proficient in frontend development through React, Angular and other frameworks, perfectly complemented by my backend development skills in NestJS, PostgreSQL and microservice architecture with Kafka and gRPC.

In addition to these, I also have a robust background in UI/UX design and have adept skills in swiftly crafting MVP prototypes. My knowledge doesn't stop at my primary competencies, I also have familiarity with several areas like blockchain technology, ChatGPT, functional programming and computer architecture.

Experience

- **Newity, Software Developer (Apr 2021 - Present)**
 - Built backend for a payment microservice
 - Worked as a frontend developer and created a new module for a major investment platform
 - Developed several MVPs with a team in an extremely short period of time
- **EnkiSoft, Frontend Developer (Aug 2019 - Feb 2021)**
 - Designed and implemented the frontend architecture for a large-scale application using Angular, GraphQL, and Apollo
- **DomRf, Front-end Developer (Feb 2019 - Aug 2019)**
 - Developed a dashboard for the HR department using React and NodeJS

Education

Bachelor's Degree in Computer Science, VIHT, 2017-2021
